## What is Piquiá wood ?

Piquiá wood is a material with a light shade and an incredible versatility. It comes from the tree of the genus *Caryocar villosum*, of the family *Caryocaraceae*. It grows mainly throughout the Amazon in upland forests. But it can also be found in other locations in the Northeast region. The Piquiá tree can reach 20 to 40 meters in height and 0.90 to 1.80 meters in diameter. It also bears prickly rind fruits that are edible after being boiled (similar to almonds). In fact, its name in Tupi (pyki) means 'thorny fruit'!

### *Characteristics :*

Colour: whitish to pink. It also goes from dark beige to brown yellow.

Other sensory characteristics: heavy wood (density 0.93 g/cm<sup>3</sup>); porous; thick texture; imperceptible smell and taste.

Durability: highly resistant and durable.

Workability: due to its high density, it is a strong wood and difficult to work with, either with manual or mechanical tools. Good finish with varnish, painting and polishing.

After a meticulous selection, the pieces are sent to the workshops. The raw wood undergoes strict quality controls. Analysis of the pattern of veins, knots, durability and strength. These steps allow us to obtain an exceptional result. Each piece is unique and take account the imperfections of raw materials. In other words, we respects the veins, contours, time stamps and the knots of wood, making it a point to exhibit and integrate them into the design of the pieces.

As seen, the quality of this wood is undeniable. However, it is for its great beauty and versatility that Piquiá wood stands out. The curved and extremely variable edges and the designs in its veins guarantee an incredible look to the projects made with this wood.

## Flat Tables

Our unique dining tables will be the masterpiece of the environment you create. The soft natural edges and the beautiful veins of the wood make it a piece your clients won't stop speaking about.

See some examples of our realizations.

**Each piece is unique.**

## Curved Tables

Impress your clients with these one piece natural wood tables. Their natural imperfections make the personality and energy of each piece unique. These tables combine the elegance of the Flat Table with the unique trunk side exposed. Masterpiece of the living room you design, your clients won't find words to describe their feelings.

**Each piece is unique.**

## Tell us your preferences

At Rua Madeira, the customer satisfaction drives our business. In order to fit your needs and to be in line with your vision, the following options are available to make your products just as you need them. For your reference, the weight of the flat tables are the following :

1,80m x 1,00m is approximately 180 kilograms.

2,40m x 1,10m is approximately 240 kilograms.

*Size : Length x Width x Height*

The standard height is 75 cm but we can adapt it to your needs. We do not recommend to lower this height due to the thickness of the top (7 cm) as it may block the arms of your dining chairs.

*Shape : There are three options for the natural edge of your Pequiá table (Curved Table only option A) :*

Option A : / \

Exposed natural edges for an enhanced natural touch

Option B : | |

Flat natural edges for a harmonized style

Option C : \ /

Facing down natural edges for a larger top surface and more body space

*Natural aspect : 3 pattern options*

Option 1 : Smooth

The top considered "smooth" is so called because of its perfect appearance, however, being a natural product, small holes and cracks are admissible within this category.

Option 2 : Organic

The organics details in the wood originate mainly from the rotting of the heartwood of the tree. When the wood is cleaned, sanded and treated, the scars of the tree's history transform into rich details of natural design.

Option 3 : Crack

Cracks are the result of the movement of wood fibers during the drying process or due to the fall of the tree. Once stable, the cracks do not tend to open more significantly. Yet these tops are locked with a flat bar on their undersides.

*Feet : 4 options to fit with your design*

Metal Black

Stainless Steel

Natural Wood

Clear Acrylic

## Delivery

After receiving these information from you (size, shape, feet and pattern preference), we will send you pictures of the product for you to validate before shipping it to you.

Your order can be delivered 2 to 6 weeks after validation of the products depending on the quantities you need. Please contact us to know the delivery time for your location.

## Our commitment

Rua Madeira takes its inspiration from iconic Brazilian design pieces created by the most talented and recognised mid-century designers. With the help of contemporary designers and respecting the artisan's principles and techniques, Rua Madeira creates tomorrow's design furniture. Experts in exceptional Brazilian design furniture, we partner with the best Brazilian artisans to bring original and unique high-quality furniture. Our pieces bring a unique design and a warm side to your interior. Respectful of nature, our craftsmen use wood from eco-responsible management.

## Respect of our planet

We ensure that the most environmentally impactful materials we use are 100% sustainably sourced. Meaning that we only use wood that comes from areas of legal extraction or reforestation. All our wood have the Document of Forest Origin (DOF, Documento de Origem Florestal) or FSC. The DOF is issued by IBAMA (Brazilian Institute of Environment and Renewable Natural Resources).
